

VistaJet introduces the first fleet of Bombardier Global 7500 aircraft unlocking the world with the largest and longest range business jet

- **The leading new aircraft will first be available commercially through VistaJet**
- **Only business jet with four living spaces, including a permanent private stateroom suite**
- **Largest galley in business aviation to provide Michelin-inspired cuisine in the air**
- **First jet arriving January 2020, with up to an additional five within the year**
- **Revolutionary new technology to combat jet lag**
- **Through the VistaJet Program, fliers can be the first to access the Global 7500 in the most cost-efficient way**

21 October 2019: Vista Global, the world's first private aviation ecosystem, exclusively introduces the Global 7500 under the VistaJet brand to its worldwide fleet of 115 aircraft. The 7500 will be a gamechanger for VistaJet Members, providing the only way to access the largest and longest-range business jet in the world, combating jetlag and opening a new world of long-haul private flying.

When it comes to speed, the 7500 has won the record for the longest mission ever flown in a non-stop flight of 8,225 nm, with a long-range flight between Sydney and Detroit, Michigan. The aircraft also set the speed record between New York and Los Angeles, hitting Mach 0.925 and sustaining that speed for more than two hours, completing the coast-to-coast flight in 3 hours and 54 minutes.

VistaJet's unparalleled network will give the Global 7500 the space to operate at its peak and open an extended world of non-stop possibility for its Members. With VistaJet, passengers can travel long-haul on the 7500 to 187 countries worldwide, unlocking access to 96% of the world and some of the most hard-to-reach areas in a single flight. For the first time, VistaJet's passengers will be able to go from New York to Hong Kong or Singapore to San Francisco in one trip, arriving up to 21% faster than the next fastest jet on the market today.

During the flight, passengers will enjoy the very best comfort and space ever provided. The Global 7500 is the only business jet with four living spaces, and the VistaJet configuration offers a permanent private stateroom suite. The living area includes a six-seat table and introduces the first new seat architecture in business aviation for 30 years, with a patented comfort and deep recline. With the largest galley in business aviation, food will be freshly prepared in the air, offering the freedom of cooking Michelin star menus the way they were intended to be. Wings precision engineered for maximum flexibility deliver unprecedented stability for an exceptionally smooth ride.

Not only will passengers arrive faster than ever before and in the very best comfort, they will do so without being burdened by jetlag. The Global 7500 uses Soleil, aviation's first circadian rhythm-based cabin lighting system. Soleil uses a revolutionary Dynamic Daylight Simulation which will help VistaJet Members combat jet lag and allow it to be an issue of the past.

Flying on the 7500 through VistaJet will be the most cost-efficient way of experiencing the world's leading jet. Using VistaJet Program instead of buying a \$70m+ asset outright, fliers will see no depreciation, no capital risk and access the company's full fleet of aircraft. In addition, customers will have the ability to select the right aircraft for their journey, with access to the full VistaJet fleet. The result is guaranteed access to the world – anywhere, anytime.

Thomas Flohr, VistaJet's Founder and Chairman, said:

"Today's announcement is yet another gamechanger for our current fliers and the many additional customers we continue attracting from our competitors. The 7500's speed, range, space and technology will have a significant impact on aviation, and I am so pleased VistaJet is the first and only company to offer it. We have had an incredible response from fliers interested in experiencing the 7500 which is reflected by the fact we are already planning the introduction of five additional jets to arrive throughout 2020.

Since founding VistaJet over 15 years ago, I have been seeking the highest standard to offer our customers a supreme flying experience, whilst being most cost efficient. We have led the change in the industry in providing our clients with the best fleet of aircraft and service, and today, we are doing it again. We are designing the future of the aviation landscape. This exciting announcement comes just a month after Vista Global's industry changing commitment to implement the highest speed KU-band internet on board its fleet."

VistaJet Members will have the opportunity to request Global 7500 immediately for flight services commencing in January 2020. Throughout the year, the company will be building its portfolio of 7500s and will operate a fleet of up to six by the end of 2020. Linking to customer demand, VistaJet will look to take on additional aircraft in 2021 and the following years.

About VistaJet

VistaJet is the first and only global aviation company. On its fleet of silver and red business jets, VistaJet has flown corporations, governments and private clients to 187 countries worldwide. Founded in 2004, the company pioneered an innovative business model where customers pay only for the hours they fly, free of the responsibilities and asset risks linked to aircraft ownership. VistaJet's signature Program service offers customers a bespoke subscription of flight hours on its fleet of mid and long-range jets, to fly them anywhere and at any time.

About Vista Global

Vista Global Holding is the world's first private aviation ecosystem. A global group headquartered at the DIFC in Dubai, Vista Global integrates a unique portfolio of companies offering asset-light services to cover all key aspects of business aviation: guaranteed and On Demand global flight coverage; aircraft leasing and finance; and cutting-edge aviation and marketplace technology. The group's mission is to lead the change to provide customers with the most advanced flying services and the very best value, anytime, anywhere around the world. Vista Global's knowledge and understanding of all facets of the industry deliver the best end-to-end offering and technology to any business aviation customer, through its VistaJet and XO branded services.
